

## RE-ORDER COMMENTS

FROM: **White River Medical Center**, Batesville, AR

DATE: 07/06/12

COMMENTS:

This is a Distilled Water Cleaner used to clean & decontaminate difficult to clean lumen & cannula instruments. In addition, **this advanced cleaning system is superior to any method used in our decontamination/cleaning processes** for orthopedic specialty instruments such as power gun set components and bone reamers. We currently have one in inventory but **need to add 2nd Mini-Max Steam Cleaner to share with ASC Sterile processing.**
